

VEHICLES
& TRAILERS

Your assets could be miles from anywhere

Make sure you know where they are

Seven Eye uses cutting edge telematics technology, combined with the latest mobile communication systems in an easy to use vehicle tracking system fully designed and supported by Seven Eye. A Seven Eye system will enable you to manage vehicle fleets and a mobile workforce more effectively.

As regulations on working time and duty of care increase, Seven Eye gives you an inexpensive business management tool that helps you to locate, support and deploy your resources more effectively; this lets you develop an efficient supply chain, control your costs and measure service levels, business targets and key performance indicators.

Seven Eye in the vehicle

- Fully installed vehicle equipment by our own dedicated team of vehicle technicians.
- 1 hour on-site installation – minimising down time.
- Can be covertly installed to reduce tampering and vandalism.
- Can be fitted to either vehicles or trailers.
- Suitable for 12v or 24v vehicles.
- Advanced low power management system. Draws less than 1 milliamp when sleeping. Includes main power fail detection.
- Reports status changes and activity in real-time.
- Geo-fencing (invisible security shield).
- Zone in reporting & zone out reporting.
- Integration with TOPS (Transport Operations & Planning System).
- Fuel consumption to mileage reporting can be supported.
- Lone working personal alarm devices.
- Employee RFID tags (Radio Frequency Identification Tags) and immobilisation device, for ultimate vehicle fleet security.

Seven Eye live on the web

- Secure web login.
- Online real-time vehicle tracking accurate to within 10 metres.
- Automatic vehicle status and activity reporting.
- Street level mapping display.
- Instant vehicle polling.
- Current & historic footprint route reports.
- Individual or group email and text (SMS) vehicle alerts.
